INSTRUMENT SERIAL NUMBERS

Each instrument has a serial number on a panel insert, tag,
or stamped on the chassis. The first number or letter
designates the country of manufacture. The last five digits
of the serial number are assigned sequentially and are
unique to each instrument. Those manufactured in the
United states have six unique digits. The country of
manufacture is identified as follows:

B000000	Tektronix, Inc., Beaverton, Oregon, USA
100000	Tektronix Guernsey, Ltd., Channel Islands
200000	Tektronix United Kingdom, Ltd., London
300000	Sony/Tektronix, Japan
700000	Tektronix Holland, NV, Heerenveen, The Netherlands

INTRODUCTION

This guide contains two references of the GPIB commands listed in Appendix A of the Programmers Reference Guide included with the 2440. The first reference, "GPIB Command Reference," sorts the commands according to type: Vertical Commands, Horizontal Commands, etc.; the second reference, "Alphabetical GPIB Command Reference," according to the alphabetical order of the commands. Both lists omit the descriptions for the commands—consult Appendix A of the Programmers Reference Guide for those descriptions.

Also included in this guide are the Event Codes and their descriptions. These are codes which the 2440 issues over the GPIB that represent errors, warnings, and other messages of interest to System Programmers.

At the end of the guide are two charts. The first chart shows the character set the 2440 displays. The second chart shows ASCII symbols and their GPIB equivalents. See the Programmers Reference Guide for information on how to use these charts.
